

# CONTENT MANAGER

Create uniformity whilst minimising typing recurrence and typist error.

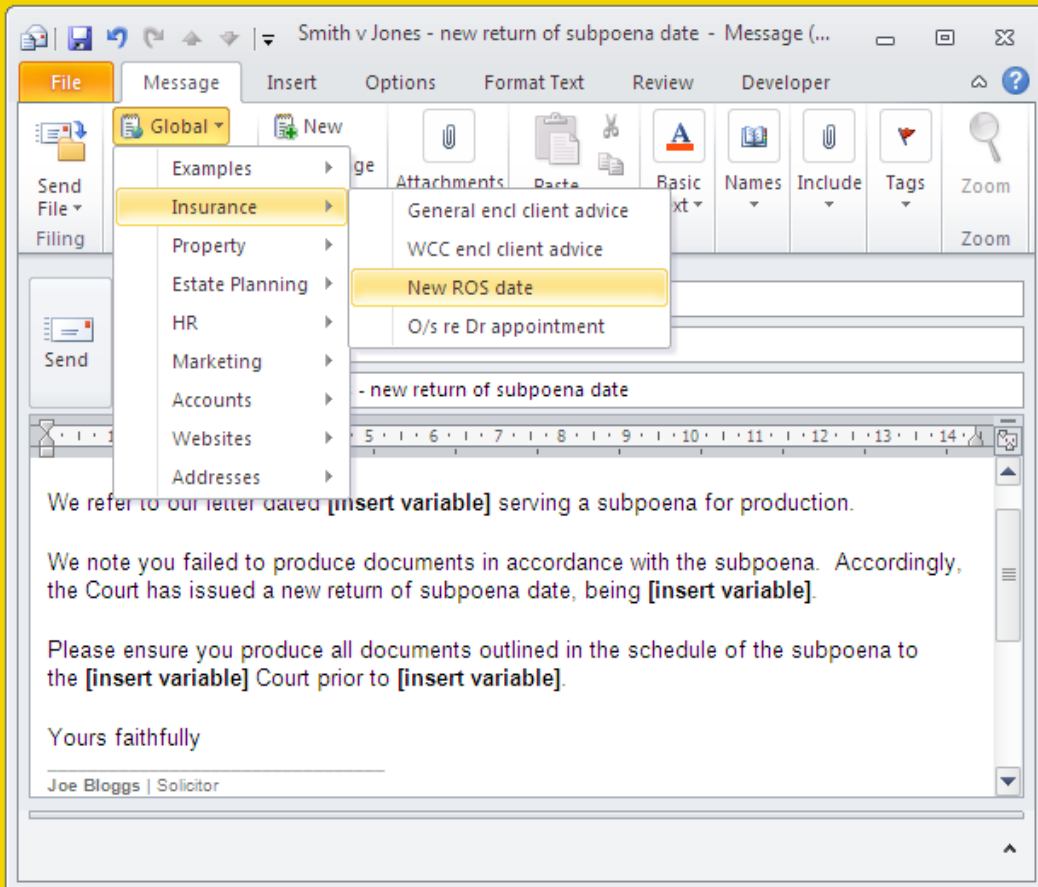

We often find ourselves typing the same phrases over and over again; why waste time and risk typist error when the inMailX Content Manager can insert content in just one click?

inMailX Content Manager allows you to create quick content which can be inserted at the push of a button. Create and deploy Global quick content to bring uniformity to your firm's email correspondence and minimise user error. Create groupings to manage your quick content which can be easily deployed and accessed firm wide. With inMailX Content Manager you can:

- ✓ Personalise quick content to reduce repetitive typing
- ✓ Centrally maintain and deploy global quick content across your firm
- ✓ Maintain favourite quick content for even easier access
- ✓ Create global email templates for use across your firm
- ✓ Manage and add personal quick text content on the fly
- ✓ Reduce the risk of typing error and increase uniformity across your business

Individual users can further tailor inMailX Content Manager to suit their needs by allocating their most commonly used Global quick content to Favourites for even easier accessibility.

Don't risk typing error; save time and increase efficiency by utilising the inMailX Content Manager.
