

OPTIONAL CONNECTORS

Improved integration with document management systems.

inMailX Optional Connectors are used to integrate inMailX with third party document management systems, network file systems and other line of business applications. Such integration reduces the complexity of sharing and managing email correspondence.

Using an Optional Connector, staff are now able to move or copy emails on send and file email "conversations" to single or multiple systems. The filing process is consistent regardless of the target system.

inMailX offers the following Optional Connectors:

- ✓ inMailX File System Connector
- ✓ inMailX SharePoint Connector
- ✓ inMailX TRIM Connector
- ✓ inMailX Worksite Connector
- ✓ inMailX Worldox Connector

The inMailX File System Connector allows filing of emails into existing clients and/or matters directory structure, and can integrate with any business application using a network file system folder structure, such as LexisNexis Affinity, MYOB Accountants Enterprise, MYOB Insolvency, APS, and many more.

When used in conjunction with inMailX Email Manager, an Optional Connector will ensure your emails are always correctly filed and managed.
